Tools For Transition

Below are a few quick tips that may help your mental health routine. These are just suggestions and not another "to do list."

- <u>Progress, not perfection:</u> You are under an unprecedented amount of stress and dealing with parameters most students won't face again in their lifetime. Consider measuring success in terms of progress instead of perfection.
- **Breathe:** It's likely that tons of stress hormones are flooding your body right now. That is normal when dealing with difficult circumstances. One of the best ways to tell our body that "it's okay" is to practice deep breathing throughout the day.
- <u>Self-Talk:</u> We can be our own worst enemy when it comes to our internal monologue. Take a moment to create a mantra or phrase to establish the mindset you'd like to have throughout the day.
- <u>Relationships:</u> Lean on your classmates, friends, and family when you
 are stressed out. Talking and sharing in our mutual challenges will help!
- <u>Laugh:</u> Try to find humor where you can. If you can't, put on a funny YouTube video and take a minute to laugh it out!
- **Find Joy:** Everyday take a minute to reflect on one thing, however small, that brought you joy.

<u>Decoding Emotions:</u> Don't let your emotions fool you. They may seem inevitable and unchangeable. They may seem like direct responses to your situation. In fact, emotions come from thoughts—not your situation but how you interpret your situation.
