

Title: Environmental and Biodiversity Education through Fieldtrips and Service Learning
Location: Local
Instructor(s): Cameron Brandy (ICS); Volunteers and Associates: Green Redmond Partnership; Green Kirkland Partnership; Eastside Audubon Society (TBD).
Capacity: 20-30
Eligibility: All interested students
Dates: 05/20/2017 – 05/24/2019
Cost and Payment Information: To be determined. I am working with all potential participants to have a cost established as soon as possible, and will provide an update when such information is forthcoming. Each day will be at a different site in Redmond/Kirkland, and students and families should plan on providing their own transportation to and from the site. In addition, students will need to bring their own lunch each day
<p>Program Description and Location:</p> <p>Students will spend a week learning about and caring for their Big Backyard: city parks within Redmond and Kirkland. Students will have opportunity to engage in park service and maintenance, participate in educational workshops and activities with park volunteers, and learn about their communities' rich biodiversity. Mixed into the work of caring for parks, two proposed fieldtrips would include a day of birdwatching with the local Audubon Society chapter, and a trip to the Community Learning Garden at Kirkland's McAuliffe park.</p> <p>Location: City Parks located within Redmond and Kirkland (Specific Site Locations TBD)</p>
