

<b>Title:</b> Learn to Sail
<b>Location:</b> Local
<b>Instructor(s):</b> Mr. Gibson
<b>Capacity:</b> 20 students
<b>Eligibility:</b>
<b>Dates:</b> May 20-24, 2019
<b>Cost and Payment Information:</b> TBD (probably around \$300)
<b>Program Description and Location:</b> In this introduction to sailing, new sailors will learn basic theory and terminology to build a sailing foundation. Students will relate science concepts that they have learned in the classroom (simple machines, wind power, buoyancy, force vectors) to the real-world application of sailing. Students will learn and practice tacking, jibing, sail trim, weight balance, and capsizing recovery, as well as teamwork, communication, observation and patience.
